USES OF ESPALIER FRUIT TREES

Espalier fruit trees trained in many different patterns adapt themselves to a variety of places. You may—

- (1) Plant Espaliers below windows—between windows.
- (2) Set them against walls, fences, trellises.
- (3) Train them on leaders at the corner of buildings.
- (4) Use these trees in the open, along paths, driveways etc.
- (5) As a hedge or screen to set off parts of the garden.
- (6) To obtain a focal point of interest in a rock garden.
- (7) Form an effective arbor over a walk.
- (8) Make an Espalier Garden House on the lawn.
- (9) For planting in Greenhouses—or pot planting on penthouse roofs.
- (10) Perk up dull corners—hide objects from view, etc.

ESPALIERS COMPLETELY TRAINED—Easy To Care For

All our varieties are carefully selected for their hardiness and suitability for Espalier training. They will thrive well in any exposure whether east, west, south or north, providing they receive a few hours of daily sun. Espalier fruit trees require even less care than other fruit trees. The difficult part, the training of Espaliers has already been done by us, and no previous knowledge or experience is necessary for you to continue growing them successfully on your grounds. The trees are easy to spray and the fruit can be readily harvested. Full cultural directions are included with every shipment.

ATTRACT ATTENTION THOUGHOUT LONG SEASON

These distinctive fruit trees are a never-failing source of interest from the time the pretty blossoms appear in the spring—until the richly colored fruit ripens. In the winter, even then, they are extremely decorative, with their lace-like shapely structure.

A DIVIDEND PAYING INVESTMENT

Aside from their beauty and charm, Espalier fruit trees are a good investment. Like vines, they take up practically no room, thus leaving the precious ground space available for flowers and vegetables. In Europe, where they have been grown for centuries, the primary object is fruit rather than display. They yield unusually excellent, large sized fruit, and of much better flavor than ordinary fruit, due to the greater sun exposure penetrating through all the branches and because the trees are grafted onto the proper root system. As the trees grow in size, the fruit crops gradually increase, and pay their owners annual dividends in fruit of the highest quality.

ESPALIERS—MAKE IDEAL HOLIDAY GIFTS

Surprise your folks and friends with an ideal living gift on Christmas, Easter, Mother's or Father's Day, Weddings, Birthdays, Anniversaries, and other important occasions.

They will enjoy beauty and a crop of large, luscious fruit for many years to come. Just imagine what lasting happiness Espalier fruit trees, trained in many fascinating forms, will bring into their lifetime.

Plants are always appropriate and pleasing gifts, because they reflect thought on the part of the giver. "*Neither Gift nor Giver Forgotten.*"

Guaranteed—Genuine Dwarf-Trained ESPALIERS

All our trees passed Federal inspection. A State Certificate accompanies each shipment. Our Espalier trees which are grafted on the proper and finest quality understock, are trained on sound biological laws to remain symmetrical forever.

Seventeen years of research has convinced us that Espaliers can be grown successfully in this country's soil and climate with a maximum of satisfaction to the owner. The average Espalier we offer for sale has been in training for a period of six years—it is the result of

faithful care and a perfect knowledge of the art of pruning and grafting. No better stock of Espalier trees can be found anywhere in the world.

Espaliers priced any lower could not be "dwarf-trained" trees. Ordinary orchard stock does not prove successful as it stubbornly resists any change in its rooted habits, and although cut back, the tree in time starts shooting upward and outward in all directions. The result is not an Espalier.

MAKE YOUR GARDEN MORE BEAUTIFUL WITH PRACTICAL ESPALIERS

"A Luxury of the Wealthy Now Within Reach of All"

Dwarf Espalier Fruit Trees were devised by clever European Horticulturists to make the most of limited space otherwise wasted. For centuries, the Old World castles and estates have relied on Espalier trees for decoration, symmetry and utility. These intriguing Espalier forms are the result of traditional Old World Charms combined with modern American needs and uses. It remained for Henry Leuthardt, America's Pioneer Espalier Specialist, whose family has been training Espaliers for generations in Switzerland, to develop these exquisite trees suitable for this country's soil and conditions.

At the age of 13, he served his apprenticeship under Old World master gardeners. He studied the science of botany at European universities and was awarded a medal by the University of Strasbourg for proficiency in the art of training Espalier fruit trees.

Coming to the United States, Henry Letuhardt devoted his life work in growing and training Espaliers. He has won honorary mention and awards at various Horticultural shows throughout the country. Some of his plantings have been viewed at Gardens on Parade, New York World's Fair; George Washington's Home, Mount Vernon, Virginia; The Metropolitan Museum of Art, Fort Tryon Park, New York; and Gardens of the Nations, Radio City New York City.

Some of the Medals awarded Henry Leuthardt for perfection in the art of training Espalier Fruit Trees.

SPECIAL INTRODUCTORY OFFER

In order that as many home owners as possible may become acquainted with our Dwarf Espalier Fruit trees, we have set aside a limited number of Single Horizontal Cordons and Fan Shaped Espaliers which we offer while they last at Special Reduction Prices which regularly sell for almost triple their prices.

You may order as many as you wish at the Special Price, making your selection from the varieties listed below. Remember, this offer is good until the limited supply is exhausted.

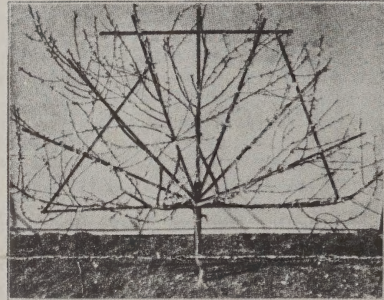

HORIZONTAL CORDON

One series of branches - 2 Year Old.

4 to 5 feet long; 2 1/2 in. high; \$2.00 each

Available in Apple, Pear, Plum varieties only.

NOTE: We do not train peach, apricot and nectarine in this shape Espalier because these varieties have entirely different characteristics and thus are not guaranteed to keep their shape in the Cordon form. This type is very ornamental along garden paths or low retaining walls.

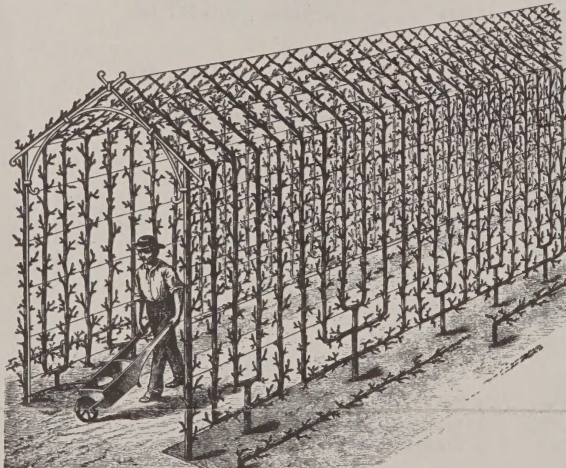

The Fan Shaped Espalier planted against walls or in the open is very effective. Especially so, at flowering time when the tree is a bower of beauty to behold. It is one of the most decorative types for covering large areas.

Available in all varieties listed.

6 ft. spread, 5 ft. high, \$5.00 ea.

8 ft. spread, 7 ft. high, \$10.00 ea.

PERGOLA

Obtained by proper planting of Cordons, U Forms, and Palmettes. No bare spaces. What a difference between Espalier Pergola and one built with grape-vines. Send us your space measurements and we shall be glad to offer you our best advice without charge.
